Intern at Harman Lifestyle Automotive Division

HARMAN

CONNECTED CAR I LIFESTYLE AUDIO I PROFESSIONAL SOLUTIONS I CONNECTED SERVICES

Are you our next Intern in EPIC "Mechanics Concept Engineering"?

You will become a member of our Mechanics engineering team, and work like the more experience senior engineers.
We are a global cross functional team, and our tasks are to engineer sound integration, industrial designed modules, and to bring "magic" user experience, into luxury car interior, in combination with our Harman sound systems.

We work primarily in the concept phase of the car's "life", which will give you the opportunity to see some of your CAD designs being realized, from e.g. our own 3D printer or via parts fabricated at some of our prototype suppliers.

We provide Mechanics engineering and user experience to all our 11 car sound brands and to many high branded cars in; USA, EU and Asia

Example of project we provided:

- Movable Loudspeaker coming up of the Instrument Panel
- Light modules integrated in Loudspeaker Grills, even floating movable light
- Exciting and exclusive Speaker Grills in different material, integrated into the door panel
- Re-engineering of car interior, as preparation for a new sound system integration

Harman develops and provides more than 50% of all branded sound systems for cars globally.

Examples of sound systems we work with:

- Bang & Olufsen
- Bowers & Wilkins
- harman\kardon
- JBL
- Mark Levinson
- Lexicon
- Infinity
- AKG

Examples of cars we work with:

- Audi
- BMW
- Aston Martin
- Volvo
- Ford
- GM
- Toyota
- Ferrari

The internship period will be paid, and we offer the option of a canteen scheme and possible accommodation throughout the period.
